

Supercharge your content experience with the video creation tool

With the ON24 platform, create engaging and impactful videos to enrich your webinars and content hubs designed for marketers, sellers and content creators.

Create new videos

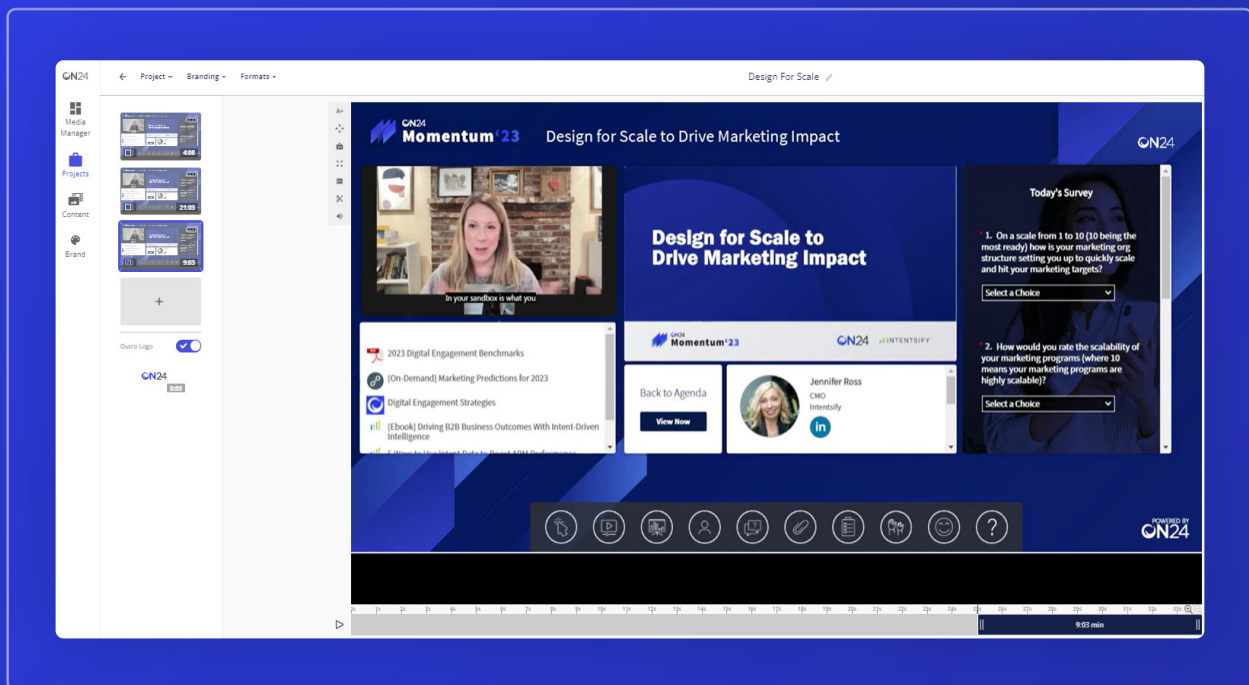

Create new videos from different materials like recorded clips, stock clips, music, images, color, as well as new recordings from your desktop.

Connected to Media Manager

Easily work with content from Media Manager, either pulling media content to create new video or publishing finished videos back to Media Manager with a single click.

Edit recorded webinars

Create short clips from recorded webinars (Single File Archive or auto media archive) or enhance them by adding effects, removing unwanted segments, adding outro and other materials.

Brand profile management

Set up and use a collection of visual elements (color palette, fonts, logos) to ensure consistent and brand-compliant video output.

Direct-recording tools

Capture speaker clips through the webcam, record a chosen screen, or use both in combination. Use editing features to finalize video with intro, text, additional visuals.

Publish finished videos

Post videos to Engagement Hub, Target and Webcast Elite, and any other destinations you use to engage with your customers and buyers.
